Ultimate Short Throw **Ceiling Solutions**

Our Ultimate Short Throw range delivers market-leading innovation and unmatched flexibility. Ceiling projection is a unique feature provided by this range that offers an effective solution to dull, enclosed areas. An image is projected downwards onto a rear projection screen fitted within the ceiling. The result is an attractive, ambient environment for multiple business and education settings.

- **Project an 80" (2m) image from only 53cm***
- **Project downwards onto a rear projection screen or ceiling tiles**
- **Creates a sense of being outdoors**
- **Multiple applications for business and education environments**
- **Ideal for enclosed rooms or spaces**
- **Table top mount ability for downward projection**
- **Simply change the projected content for a new look or feel**
- **Project static or video based content**
- **Easy to set up**

Ultimate Flexibility

Since we developed our first short throw projector, we've been refining and streamlining our design to make it more functional, more attractive and more convenient. The compact lightweight chassis makes this range easy to install and flexible to use.

With the optional table top mount kit you can project downwards onto many ceilings.
